

HELPING MANKIND STAY WELL

We believe in improving people's health
while doing it the right way for our planet

NATURAL ASTAXANTHIN

from happy *Haematococcus
pluvialis* cultivated using
raceway technology

NatAxtin
Made as nature intended

Reliable, trusted supplier with
large production capacity

Guaranteed safety, quality and consistency of Astaxanthin manufactured by Atacama Bio
Environmentally friendly manufacturing process by unique and ultra clean cultivation of algal biomass
Safe and pure product - no organic solvents used, Non-GMO microalgae cultivated

Why choose Atacama Bio as your business partner?

One step ahead

**Lowest carbon
footprint**

Scalable, biomimetic, low energy consuming raceway manufacturing process. Carbon required for algae metabolism is captured from atmospheric CO₂.

World class

State-of-the-art facilities located in the most advantageous place in the world for *Haematococcus pluvialis*.

Sustainable

Pure and natural water sourced from the Andes Mountains and the most intense sunlight on Earth.

**Clean and
safe**

Pristine and unpolluted environment along with a controlled proprietary process provides ideal conditions for top-quality Astaxanthin production.

**Unsurpassed
team**

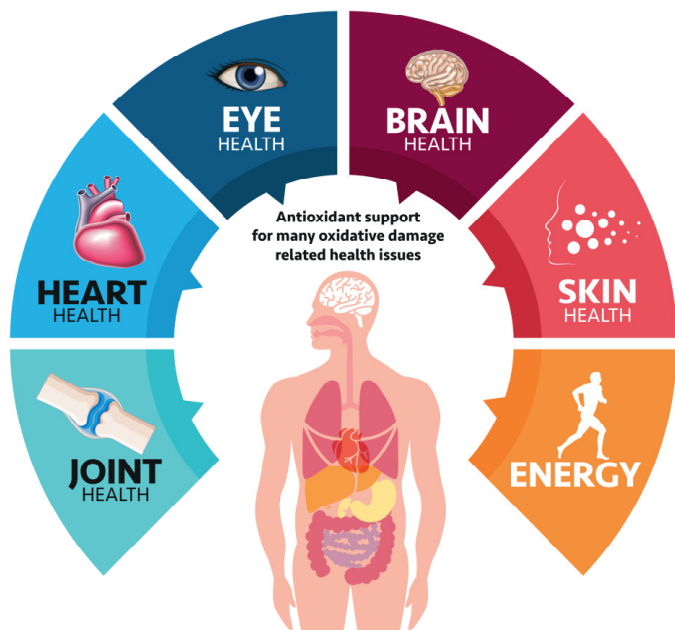

Multidisciplinary team with more than 30 years' experience developing industrial technology in the Atacama Desert. Innovative corporate culture ensures constant specialization and improvement.

BENEFITS OF NatAxtin™

Made as nature intended

POWERFUL

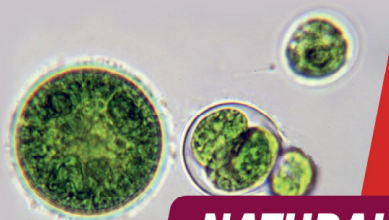

SAFE

- Astaxanthin can cross the blood-brain and retina barriers
- It reduces DNA damage and protects the cell membrane

ATACAMA BIONATURAL
 NATURAL PRODUCTS S.A.
www.atacamabionatural.com

NATURAL

- Carotenoid pigment found in shrimp, salmon and algae
- Higher bioavailability, safety and efficacy vis-a-vis other sources of Astaxanthin
- Anti-oxidant properties 6,000 times more potent than Vitamin C
- Has been part of human evolution from the beginning as part of our natural food chain

SUSTAINABLE

- Non-GMO Haematococcus pluvalis
- Photobioreactors take advantage of high-intensity natural solar radiation
- 100% recycled water used to produce algae harvested through centrifugation
- Fights global warming by capturing carbon dioxide and releasing oxygen
- Low energy consumption

BROAD SPECTRUM OF APPLICATIONS

- Dietary and Nutritional Supplements
- Food & Beverage fortification
- Sports nutrition
- Cosmetics
- Dosage form 4 to 12 mg per day
